

Motor Vehicle

Sum Insured motor vehicle replacement cost calculators enable users to quickly and easily calculate the correct amount of insurance cover they require.

Every year thousands of cars are damaged in collisions and many thousands more are stolen. Many of these people are underinsured, which inevitably leads to disappointment, financial hardship and frustration. Then as the true picture emerges this often gives way to dissatisfaction and anger.

When a client is underinsured, no one wins!

The client loses because they don't receive adequate financial compensation for the loss of their valuable assets. By the same token the insurance company misses out because they have not been collecting the correct premium that results when a client is properly insured added to which is the feeling from the client that somehow they have been let down by their insurer.

Sum Insured works with a number of the well known motor vehicle price research companies to bring to you a range of unique services that will assist you to properly calculate the current valuation of your motor vehicle.

Sum Insured works by asking the client a number of simple questions about their motor vehicle such as what make, model, year built, accessories and a couple of other simple questions. Based on our expert research the application then calculates a current valuation and provides the user with a comprehensive report.

Sum Insured provides users with a service that will give them peace of mind, knowing that should their motor vehicle be involved in an accident or the unthinkable ever occur and the vehicle be stolen, then it will be insured for its correct current valuation price.
